

Digital File Specifications

We prefer files on the Macintosh Platform using: QuarkXpress, Photoshop, and Illustrator. We recommend compressing the files with ® Stuffit along with sending non compressed versions. We need all spot colors noted, yet specified as CMYK . Documents must be created 100% to size. Screen and printer fonts must be included. A digital proof (PDF) with the fonts converted to paths is also helpful. A hard copy such as inkjet, laser or other color output must be provided in CMYK, with the size and special instructions noted.

Line Art -

Supplied at no less than 600 dpi.

CMYK Art-

Four Color process scans must be supplied at least 300 dpi, 150 lines per inch at 100%.

Vector Art-

Spot Colors Noted, used, in following format : Editable EPS _ with fonts converted to paths.

Fonts -

Send All Fonts used in your design.

Media should be on CD or Zip Disk (100 or 250)
